

# New Hampshire roundtable to bring together thought leaders on issues of complex-care management

Monday, November 16, 2015

***Press release submitted by Senscio Systems, Inc.***

---

*How do we increase independent living and lower costs for people with complex conditions? Healthcare leaders from New England and South Dakota to discuss key issues and possible solutions.*

Senscio Systems, Inc., a healthcare tech startup that has developed an artificial intelligence-based services and support solution for managing complex-care conditions, is hosting an invitation-only roundtable conference on Nov. 17, 2015, at the Sheraton Hotel in Portsmouth, NH. The discussion will focus on how to provide stable, safe, institution-free, and cost-effective care for people with complex conditions. The participants, healthcare leaders from ACOs, hospitals, nonprofits, and government, will discuss the current unmet needs in care delivery found in their organizations and will determine how innovative, technology-based models can improve care to meet the standards of the [Chronic Care Model](http://improvingchroniccare.org/index.php?p=The_Chronic_Care_Model&s=2) ([http://improvingchroniccare.org/index.php?p=The\\_Chronic\\_Care\\_Model&s=2](http://improvingchroniccare.org/index.php?p=The_Chronic_Care_Model&s=2)).

Dr. Soeren Mattke, Managing Partner at RAND Health Advisory Services, will moderate the event with Dr. Piali De, CEO and co-founder of Senscio Systems, Inc. The other participants include Mr. Nick Toumpas, New Hampshire Commissioner of the Department of Health and Human Services; Dr. Richard Goldstein, President of Central Maine Medical Health Physicians Group; Mr. Cullen Ryan, the Executive Director of Community Housing of Maine; Dr. Allan Teel, Chairman of the Board of ElderCare Network of Lincoln County in Maine; Ms. Ellen McCahon, Healthcare Management Executive and Principal of Helms & Company; Mr. Darryl Millner, Assistant Director of the Division of Developmental Disabilities in the South Dakota Department of Human Services; Ms. Jessica Maurer, Esq, Executive Director of the Maine Association of Area Agencies on Aging and Chair of the Maine Council on Aging; and Ms. Elaine Roberts, Executive Director of South Dakota Parent Connection.

“Population ageing and improved survivability of many diseases means that we are faced with an increasing number of people living with complex chronic conditions,” said Soeren Mattke on the reasoning behind the topic for the roundtable. “We need to find ways to let them age in place, safely, conveniently, and cost-effectively.”

For those attending the event, there will be a networking hour after the close of the roundtable. The discussion may be followed live on twitter @sencio.

### **About Sencio Systems, Inc.**

Founded in 2010 and headquartered in Boxborough, MA, Sencio Systems, Inc. is a leading technology company in the rapidly changing world of healthcare. The company’s primary offering is their Ibis™ solution. Ibis provides a clinical safety net that enables care in the least restrictive setting for people with complex clinical, social, and behavioral conditions. Using patent-pending artificial intelligence, Ibis recognizes emerging health issues and care gaps in real time, provides self-care protocols, and alerts the care team to early intervention opportunities, avoiding the need for hospitalization. For more information, email [info@ibiscare.net](mailto:info@ibiscare.net) (<mailto:info@ibiscare.net>), visit [www.senciosystems.com](http://www.senciosystems.com) (<http://www.senciosystems.com>), or follow us on Twitter @sencio.
